Sign and Brail making **Rotary Engraver** from \$173/week exGST
RE-IS900 635mm x 435mm 95Kg
 - compatible with print and cut features
 - able to engrave stainless steel and brass
 - can be optioned to produce raised brail signs
 - auto depth and fast clamping system
 - great for office signage and business plaques

Small Safety Guillotine CS 330mm

Safety Circular Saw SE-saw -1200mm

Engraving Laminates

From our extensive range, we will help you select the correct material for you application, with consideration to

- * Thickness
- * Abrasion
- * Flexibility
- * "UV" resistance
- * Temperature resistance
- * Brass aluminium or plastic
- * Self adhesive
- * Laser engraver comparable

Cermark for Black text on Stainless Steel

We can advise the correct spraying and washing procedure and laser power setting to get a deep black finish on s/steel and other materials we can advise

- * Cermark, thermark or tape
- * Spray or paste
- * Alternative blacking solutions

Cutters for Engravers and Routers

Engraving Machines are very "cutter specific"

- * The diameter and length must be correct
- * Cutting, scribing or burnishing
- * Cutter settings for hard metal / soft plastic
- * Tip size for 3mm or 30m high letters
- * Top loading, collet or insert type of cutter

We can advise the correct cutter for your engraver or router we also have a cutter sharpening service

Doming Resin

Doming Resin on printed decals and badges Gives a value added 3D look.

Resin type and application is very specific:

- * Flexible/soft resin for decals
- * Rigid resin
- * High dome resin option
- * Outdoor full sun light application
- * Do you have a dual or single UV band oven
- * Applying the resin and removing the bubbles

We can supply a start-up system and supply the various resins
