

Commercial grade Gravograph engravers

If you have a high volume of engraving work, investing in a commercial-grade engraver can be a wise decision. Commercial engravers are designed to handle high production volumes and are built to last. They are also faster and more efficient than consumer-grade engravers, which can save you time and money in the long run. For instance, if you have 12 hours of engraving work each week, purchasing a machine that is twice as fast, can save you 6 hours per week of expensive labor. Over one year, you can save 300 hours, and for many firms, the cost of the upgrade will be paid for in one year by the time savings.

We, provide expert advice, installation, training, and troubleshooting services, backed by over 60 years of experience in the industry. Our team is dedicated to ensuring that your engraving system is always up and running, and we are committed to helping you overcome any challenges that may arise with your operator, PC, software, or machine.

With our three-step process your staff can quickly make labels with ease. First, we assess the items you need to engrave and determine the best engraving system for your workshop, including capital and ongoing running costs. Second, assemble all the components in their quality control area and test engrave in our workshop. And conduct a full dress rehearsal with samples for you to see, sorting out all connectivity issues. Finally, provide comprehensive training to your staff, with easy-to-follow cheat sheets, screen shots, and big red “click here” arrows. Training can be done in our office, in the metro area, or remotely via TeamViewer.

M40 Gravotech Most popular rotary engraver - is extremely quiet when correctly fitted with a balanced cutter self centre vice ,or bed 300x200 19KG, speed 25mm/sec supplies with easy to use ABC software (with PC) \$14,700 ex advanced system for mass production (with PC) \$16.200ex optional -, vac \$1,200 ex , Guillotine \$1,900 ex

M20v3 Gravotech small very fast rotary engraver extremely quiet when fitted with a balanced cutter, easy self centre vice or bed 100x100 12Kg speed 40mm/sec supplies with easy to use ABC software (with PC) \$11,500 ex or our advanced system for mass production (with PC) \$13.900ex (jewellery versiion poa approx (with PC)\$18,000ex optional -, vac \$1,200 ex , Guillotine \$1,900 ex

IS400 Gravotech able to engrave stainless easy self centre vice or bed 300x200 42Kg 50mm/sec supplies with easy to use ABC software \$22,500 ex advanced system for mass production G10 \$24,700ex optional -, cutter grinder \$3,800ex , vac \$2,100 ex , Guillotine \$1,900 ex

ISxxxx Gravotech CNC Heavy Duty Rotary Engraver
 IS6000 600x400 168 Kg 60mm/sec /software/ PC \$35,700 ex
 IS7000 600x800 220 Kg 60mm/sec /software/ PC \$42,600 ex
 IS8000 600x1200 250 Kg 60mm/sec /software/ PC \$52,900 ex
 optional --vice \$1,200, cutter grinder \$3,800ex vac \$2,100 ex , Guillotine \$1,900 ex

LSxxxx Gravotech Laser Engravers
 LS100E8 25w 460x300 35 Kg 1,000mm/sec /software/ PC \$19,200 ex
 LS100IQ 40w 460x300 42 Kg 2,000mm/sec /software/ PC \$28,900 ex
