### Automatic Flame Sensor

TM600 is equipped with 7 flame sensors within its working area. If a flame is detected during operation, an alarm will immediately sound.

### Automatic Fume Filter

Triple Layer Protection.  Equipped with a high-quality three-layer filter, including a pre-filter, HEPA filter, and activated carbon filter.

### Emergency Stop.

Immediate Shutdown. An emergency stop button on the side of the machine instantly halts operation in case of urgent situations.

### Fully Enclosed.

Complete Protection. Constructed with a full metal enclosure, the machine stops automatically when the lid is opened.

## Fume Management

#### \*Recommended

Heavy Duty Carbon Filter  
(for most workshops)  
Removes all Particulate matter and 95% of plastic odour

Budget Carbon Filter  
for well ventilated area  
(Large Workshop)  
Removes all Particulate matter and 70% of plastic odour

Commercial Carbon Filter  
for non ventilated area  
(Small room or Donga)  
Removes all Particulate matter and 99.9% of plastic odour

Low noise in-line exhaust fan kit. DIY Install vent fumes outside. No filtration cutting fumes very smelly for non-residential area
