BUILT AROUND YOUR WORKFLOW

A practical system is more than the laser: it is the machine, safe setup, repeatable files, suitable extraction, trained operators and a support path.

1

Move through batches

A 50W source supports faster production across repeated metal-tag work.

2

Handle longer layouts

The long-field configuration is intended for strip plates and elongated labels.

3

Keep serial work local

Create durable asset IDs, machine plates and QR-coded tags on demand.

4

Build a production cell

Add jigs, rotary marking and a dedicated PC as volume grows.

CORE APPLICATIONS

- Long stainless marker plates
- Equipment and compliance plates
- Batch serial and asset tags
- Tool, component and part marking
- Industrial data-matrix and QR workflows

COMPLETE KIT AND OPTIONS

COMPLETE KIT • \$14,250 + GST

- MetalMaster MM150 50W desktop system
- Carbon filtration system
- Preconfigured PC, HD monitor, keyboard + surge protection
- Annual service, six-month check + remote training/support
- Sample tag pack + capital-city delivery

COMMON OPTIONS

- Dedicated PC
- Rotary attachment
- Carbon/particulate filtration as required
- Custom plate jigs
- Service plan and starter materials

KEY SPECIFICATIONS

LASER	50W fibre
FIELD	150 mm-class long-field configuration*
POSITIONING	Red-dot pointer alignment
CAMERA	Not fitted
FORMAT	Desktop open system
BEST SUBSTRATES	Stainless steel, anodised aluminium and selected metals
SAFETY	Open laser system; controlled Class 4 work practices required

ENGRAVE YOUR OWN LABELS TODAY - DON'T WAIT 3 WEEKS

SAFE USE + QUOTATION NOTES

- *Final X/Y field and lens must be verified on the quotation; current internal sources conflict between 150 × 50 and 150 × 100 mm.
- The MM150 is not a Class 1 enclosed machine.
- A laser-controlled area, suitable PPE, training and a documented safe-work procedure are required.

MACHINE \$11,900 + GST • COMPLETE KIT \$14,250 + GST
